

JIHONG JEON

gaebalja626@gmail.com | github.com/Gaebalja626

EDUCATION

Seoul National University of Science and Technology
B.S. in Artificial Intelligence Application | Scholarship Recipient

Mar. 2023 - Present

PUBLICATIONS

From Diffusion to Flow: Efficient Motion Generation in MotionGPT3

Mar. 2026

- ICLR 2026 Accepted at ICLR 2026 ReALM-GEN Workshop
- Verified flow matching achieves comparable performance with fewer inference steps in motion generation
- Authors: Jaemin Ban, **Jihong Jeon**, Sangyeop Jeong | Advisor: Prof. Kyungwon Seo

SWiT: Spectral Wiener Test-Time Adaptation for Time Series Forecasting

May 2026

- NeurIPS 2026 (Under review at NeurIPS 2026)
- Replaced gradient-based test-time adaptation with a closed-form spectral filtering approach achieving SOTA performance in time series forecasting with significant parameter efficiency
- Authors: **Jihong Jeon**, Jeonghwan Im | Advisor: Prof. Hyuk-Yoon Kwon

EXPERIENCE

AI Document Translation Service – Founder & AI Developer

Feb. 2026 – Present

Xinote

- Built translation pipeline with document understanding and layout aware structural preservation
- Quantized and improved OCR and layout detection models
- Developed a Korean lecture speech recognition model for educational audio transcription and note generation

Undergraduate Researcher – BigBase Lab

Dec. 2025 - Present

Seoul National University of Science and Technology

- Researching test-time adaption for non-stationary multivariate time series forecasting

Teaching Assistant – Calculus & Probability and Statistics

Mar. 2024 - Present

Seoul National University of Science and Technology

- Tutored 300+ students in Calculus I/II and Probability & Statistics

AWARDS & COMPETITIONS

LG Aimers 8th LLM Lightweighting Competition – 2nd/628

Apr. 2026

LG AI Research

- Optimized LLM efficiency via pruning and FP8 quantization, improving performance–latency trade-off

K-League Univ. of Seoul. AI Competition – 6th/937

Dec. 2025 - Jan. 2026

University of Seoul

- Build a time series forecasting model for soccer ball coordinate prediction with soccer game context

3rd Kookmin Univ. AI Big Data Competition – 2nd/960

Nov. 2025

Kookmin University

- Built time series models for future demand forecasting under limited exogenous features

2024 Winter SCI Speech Recognition Bootcamp – 2nd/8

Dec. 2024

Seoul National University of Science and Technology

- Developed Korean lecture domain ASR models from scratch

TECHNICAL SKILLS

AI/ML: PyTorch, Time Series Forecasting, LLM Quantization, Motion Generation, Auto Speech Recognition

Languages: Python, CUDA C/C++, Java, JavaScript

Tools: Git, Linux, Weights & Biases, Notion

RESEARCH INTERESTS

Time Series Forecasting under Distribution Shift, Financial Time Series Forecasting, LLM Compression & Quantization, LLM Agent
